NATARAJA - THE LORD OF DANCE

The Lord of Dance - Nataraja is one of the most significant imagery & analogy of Creation as a Cosmic dance. Creation seems random and accidental but there is coherence & synchronisation within .

It represents the exuberance of creation born out of eternal stillness - Siva (void).

Like the cosmic creation , dance is meditation in movement...every movement arising in the present moment from the seat of absolute awareness & stillness. The dynamism and chaos on the outside is guided by coherence & intelligence within.
